

## Aksa Akrilik consolidates its Energy Business under Akset Enerji

**As a result of the restructuring process started in late 2024 based on its sustainable growth and specialization targets, the energy business of Aksa Akrilik gained an independent legal personality with the name of Akset Enerji Üretim A.Ş. This structural transformation will enable the energy business to be managed more independently which, in turn, will make it possible to evaluate potential growth opportunities more effectively.**

Aksa Akrilik, a group company of Akkök Holding, incorporated Akset Enerji Üretim A.Ş. by means of partial demerger via facilitated procedure through associate model with a view to creating a separate corporate structure for its energy business. Based on the new structure, all assets and liabilities of the energy business were taken over by Akset Enerji which was established as a wholly owned subsidiary of Aksa Akrilik in order to conduct energy operations with a more focused and strategic outlook. This structural transformation will enable the energy business to be managed more independently which, in turn, will make it possible to evaluate potential growth opportunities more effectively.

### Mr. Ceyhan Arık was assigned as the General Manager

Akset Enerji Üretim A.Ş., incorporated as a result of the restructuring process initiated by Aksa Akrilik in late 2024, signifies an important breakthrough that promotes the strategic growth targets and sustainability vision of Akkök Holding rather than a mere organizational separation. The incorporation of Akset Enerji will enable Aksa Akrilik to offer its engineering services to external customers. Hence, the company will be positioned as a competitive and innovative solution partner. Also, it will create new opportunities for both our country and our group thanks to its innovative engineering solutions.

Mr. Ceyhan Arık, Director of Energy and Utilities at Aksa Akrilik, was chosen to act as the leader of this new epoch due to his experience and technical knowledge in the industry. Mr. Arık will assume an active role in the institution of the corporate structure as the General Manager of Akset Enerji Üretim A.Ş.

### Energy capacity to be expanded for industrial and free consumers

Akset Enerji aims to provide solutions that will increase operational efficiency and promote sustainable energy management through uninterrupted services by focusing on the needs of industry with respect to energy maintenance, automation and advanced technology solutions. It intends to enlarge its generation capacity to meet the energy needs of industrial enterprises and free consumers, optimize the energy supply chain by means of long-term trade agreements and create competitive edge through sectoral analyses in near future.

Also, the company will make strategic use of its raw material storage capabilities and port capacity in order to ensure integration to the evolving logistics and storage ecosystem and expand the business to new fields.
